MT42TR Brass Cabinet Backplate

A refined layer. A distinctive point of view.

The MT42TR Brass Cabinet Backplate adds depth, dimension, and architectural presence to cabinet hardware, transforming a functional element into an intentional design statement.

Designed to complement numerous Ashley Norton cabinet knobs and pulls, the MT42TR offers greater freedom to create a look tailored to the space. Pair the backplate and hardware in the same finish for a sophisticated, tonal composition, or mix finishes to introduce contrast and a more curated aesthetic.
