

ASHLEY
NORTON

HOSPITALITY AND COMMERCIAL DIVISION

Ashley Norton collaborates with architects, designers, and developers to create hardware that is both purposeful and enduring. From refined adaptations to fully bespoke designs, each solution is tailored to the unique vision of the project.

Our experience spans from large-scale developments to boutique properties, always guided by a commitment to craftsmanship, precision, and design integrity.

HOSPITALITY PRODUCTS

Crafted to exacting tolerances, Ashley Norton hardware is designed for the demands of luxury hospitality environments. Our collections balance performance with refined design, supported by the ability to meet tight project timelines without compromising quality.

Coordinated electronic (RFID) lock trim ensures a consistent design language throughout. Integration experience includes Vingcard Essence and Signature, as well as Dormakaba Quantum Pixel+.

HOTEL SAN BUENA (VENTURA, CA)

COMPATIBILITY

All Ashley Norton mortise locks are made in the USA and meet the highest standards, including UL 3-hour fire ratings and Grade 1 ANSI/BHMA A156.13 certification. Systems are available in multiple backset options, including electrified configurations, and accommodate specialty functions such as storeroom, office, and classroom.

Hardware trim can be modified to integrate seamlessly with leading commercial lock platforms, including Schlage, and is available for use with advanced RFID technology across guestrooms, common areas, and privacy applications.
